Appendices
Appendix I Final Qualifications Msc. Programme
Appendix II Faculty Evaluation Plan
Section A: Faculty section

1. General provisions

Article 1.1 Applicability of the Regulations

1. These Regulations apply to anyone enrolled for the programme, irrespective of the academic year in which the student was first enrolled for the programme.

2. These Regulations enter into force with effect from 1 September 2018.

3. An amendment to the Teaching and Examination Regulations is only permitted to concern an academic year already in progress if this does not demonstrably damage the interests of students.

Article 1.2 Definitions

The following definitions are used in these Regulations:

a. EC (European Credit): an EC credit with a workload of 28 hours of study;

b. examination: the final examination of the Master’s programme;

c. semester: the first (September - January) or second half (February - August) of an academic year;

d. joint degree: a degree awarded by an institution together with one or more institutions in the Netherlands or abroad, after the student has completed a study programme (a degree programme, a major or a specific curriculum within a degree programme) for which the collaborating institutions are jointly responsible;

e. educational component: a unit of study of the programme within the meaning of the WHW;

f. period: a part of a semester;

g. practical exercise: the participation in a practical training or other educational learning activity, aimed at acquiring certain (academic) skills. Examples of practical exercises are:
   - researching and writing a thesis or dissertation
   - carrying out a research assignment
   - taking part in fieldwork or an excursion
   - taking part in another educational learning activity aimed at acquiring specific skills, or
   - participating in and completing a work placement;

h. programme: the totality and cohesion of the course components, teaching activities/methods, contact hours, testing and examination methods and recommended literature;

i. thesis: a component comprising research into the literature and/or contributing to scientific research, always resulting in a written report;

j. SAP/SLcMVU: the Student Information System;

k. study guide: the guide for the study programme that provides further details of the provisions and other information specific to that programme. The study guide (or course catalogue) is available electronically at: https://www.vu.nl/en/study-guide/;

l. workload: the workload of the unit of study to which an interim examination applies, expressed in terms of credits = EC credits (ECTS = European Credit and Transfer Accumulation System). The workload for 1 year (1,680 hours) is 60 EC credits;
m. academic year: the period beginning on 1 September and ending on 31 August of the following calendar year;

n. interim examination: an assessment of the student’s knowledge, understanding and skills relating to a course component. The assessment is expressed in terms of a final mark. An interim examination may consist of one or more partial examinations. A resit always covers the same material as the original interim examination;

o. University: Vrije Universiteit Amsterdam;

p. Student Charter: A document which describes all rights and responsibilities as a student of the Vrije Universiteit, and is available on VUnet

q. subject: see educational component

r. WHW: the Dutch Higher Education and Research Act (Wet op het Hoger Onderwijs en Wetenschappelijk Onderzoek);

s. OLC: Programme committee;

t. FGV: Faculty joint assembly – assembly of the faculty student council and faculty staff council;

u. CvB: the Executive Board of Vrije Universiteit Amsterdam.

The other terms have the meanings ascribed to them by the WHW.

2. Study programme structure

Article 2.1 Structure of academic year and educational components

1. The study programme will be offered in a year divided into two semesters.

2. Every semester consists of three consecutive periods of eight, eight and four weeks.

3. An educational component comprises 6 EC or a multiple thereof.

4. By way of exception to paragraph 3, Section B may stipulate that a unit of study comprises 3 EC or a multiple thereof. The Faculty Board requests permission from the Executive Board.

3. Assessment and Examination

Article 3.1 Signing up for education and interim examinations

1. Every student must sign up to participate in the educational components of the programme, the examinations and resits. The procedure for signing up is described in an annex to the Student Charter.

2. Signing up may only take place in the designated periods.

Article 3.2 Type of examination

1. At the student’s request, the Examinations Board may permit a different form of interim examination than that stipulated in the course catalogue. If applicable, more detailed regulations on this are included in the Rules and Guidelines for the Examinations Board.

2. If an educational component is no longer offered in the academic year following its termination, at least one opportunity will be provided to sit the interim examination(s) or parts thereof and a transitional arrangement will be included in the programme-specific section for the subsequent period.
Article 3.3 Oral interim examinations

1. An oral assessment is public unless the Examinations Board or examiner determines otherwise in an exceptional case.

Article 3.4 Determining and announcing results

1. The examiner determines the result of a written interim examination as soon as possible, but at the latest within ten working days. By way of departure from that stipulated in the first clause, the marking deadline for papers and examinations with at least 50% open questions in no longer than 15 working days, and for theses and final assignments is no longer than twenty working days. The examiner will then immediately ensure that the marks are registered and also ensures that the student is immediately notified of the mark, taking due account of the applicable confidentiality standards.

2. The examiner determines the result (i.e. mark) of an oral examination as soon as possible after the examination has finished, but in any case within 24 hours, and informs the student accordingly. The third clause of the first paragraph applies.

3. In the case of alternative forms of oral or written interim examinations, the Examinations Board determines in advance how and by what deadline the student will be informed of the results.

4. A student may also submit a request for reassessment to the examiner. A request for reassessment does not affect the time period for lodging an appeal.

5. A student may lodge an appeal against the way in which the result was reached with the Examination Appeals Board within six weeks of the announcement of the result.

Article 3.5 Examination opportunities

1. a. Per academic year, two opportunities to take examinations per educational component will be offered.
   b. The options for retaking practical components, work placements and theses are detailed in the relevant work placement manual, teaching regulations or graduation regulations.

2. The most recent mark will apply in the event of a resit. A retake is allowed for both passed and failed units of study.

3. The resit for a (partial) interim examination must not take place within ten working days of the announcement of the result of the (partial) examination being resat.

4. The Examination Board may allow a student an extra opportunity to resit an interim examination if that student is lacking only those credits to qualify for his degree. This is conditional to the student’s having failed the examination during a previous attempt. Furthermore, there may be no more regular opportunities for resitting the examination in the current academic year. If necessary, the method of examination may deviate from the provisions in the study guide. This provision excludes the practical assignments (including the Master’s thesis/research projects). Requests for an additional examination opportunity must be submitted to the Examination Board no later than 1 July.

Article 3.6 Marks

1. Marks are given on a scale from 1 to 10 with no more than one decimal point.

2. The final marks are given in whole or half points.

3. Final marks between 5 and 6 will be rounded off to whole marks: between 0.1 - 0.4 rounded down; between 0.5 - 0.9 rounded up. To pass a course, a 6 or higher is required.

4. The Examination Board can allow to use symbols rather than numbers, for example; Good (V), Sufficient (V), or Insufficient (OV), or Completed (VD), or completed (NVD).
Article 3.7 Exemption

1. At the written request of the student, the Examination Board may exempt the student from taking one or more examination components, if the student:
   a) has passed a course component of a university or higher professional education programme that is equivalent in terms of content and level;
   b) has demonstrated through his/her work and/or professional experience that he/she has sufficient knowledge and skills with regard to the relevant course component.

2. For the Master’s thesis/the research project there is no exemption possibility.

Article 3.8 Validity period for results

1. The validity period of interim examinations passed and exemption from interim examinations is unlimited, unless otherwise specified in Section B.

2. The validity period of a partial examination is limited to the academic year in which it was sat unless otherwise specified in Section B.

Article 3.9 Right of inspection and post-examination discussion

1. For twenty working days after the announcement of the results of a written (or digital) interim examination, the student can, on request, inspect his/her assessed work, the questions and assignments set in it, as well as the standards applied for marking.
   The place and time referred to in the previous clause will be announced at the time of the interim examination and/or via Canvas.

2. If a collective post-examination discussion has been organized, individual post-examination discussions will be held only if the student has attended the collective discussion or if he/she was unable to attend the collective discussion through no fault of his/her own.

3. Students who meet the requirements stipulated in paragraph 2 can submit a request for an individual post-examination discussion to the relevant examiner. The discussion shall take place at a time and location to be determined by the examiner.

4. Academic student counselling and study progress

Article 4.1 Administration of study progress and academic student counselling

1. The faculty board is responsible for the correct registration of the students’ study results. After the assessment of an educational component has been registered, every student has the right to inspect the result for that component and also has a list of the results achieved at his/her disposal in VUnet.

2. Enrolled students are eligible for academic student counselling. Academic student counselling is in any case provided by
   a. The Student General Counselling Service
   b. Student psychologists
   c. Faculty academic advisors

Article 4.2 Adaptations for students with a disability

1. A student with a disability can, at the moment of submission to VUnet, or at a later instance, submit a request to qualify for special adaptations with regard to teaching, practical training and interim examinations. These adaptations will accommodate the student’s individual disability as much as possible, but may not alter the quality or degree of difficulty of a unit of study or an examination. In all cases, the student must fulfil the exit qualifications for the study programme.
2. The request referred to in the first paragraph must be accompanied by a recent statement from a doctor or psychologist. If possible, an estimate should be given of the potential impact on the student’s study progress. In case of a chronic disability a single (one time) request suffices.

3. Students with a disability that can be assessed by a psycho-diagnostic evaluation (e.g. dyslexia, attention-deficit disorder) must provide a statement from a BIG, NIP or NVO registered professional who is qualified to conduct such a psycho-diagnostic evaluation.

4. The faculty board, or the responsible person on behalf of the faculty board, decides on the adaptations concerning the teaching facilities and logistics. The Examinations Board will rule on requests for adaptations with regard to examinations.

5. In the event of a positive decision (possibly with a limited validity) in response to a request as referred to in paragraph 1, the student will make an appointment with the study adviser to discuss the details of the provisions.

6. A request for adaptations will be refused if it would place a disproportionate burden on the organization or the resources of the faculty or university were it upheld.

7. If the disability justifies an extension of the interim examination time, the Examinations Board will issue a statement testifying to this entitlement to an extension. If a disability justifies other measures to be taken, the academic adviser can take the necessary measures.

5. Hardship clause

Article 5.1 Hardship clause

In instances not regulated by the Teaching and Examination Regulations or in the event of demonstrable extreme unreasonableness and unfairness, the faculty board responsible for the study programme will decide, unless the matter concerned is the responsibility of the Examinations Board.
Section B1: Programme specific – general provisions

6. General programme information and characteristics

Article 6.1 Study programme information

1. The programmes (i) Clinical and Developmental Psychopathology CROHO number 60513, (ii) Cognitive Neuropsychology CROHO number 60510, (iii) Genes in Behaviour and Health CROHO number 69324, and (iv) Social Psychology: Regulation of Social Behaviour CROHO number 60053, are available on full-time basis.

1b The language of instruction is English.

Article 6.2 Teaching formats used and modes of assessment

1. The programme uses the teaching formats as specified in the Study Guide.

2. The modes of assessment used for each educational component are specified in the Study Guide.

7. Further admission requirements

Article 7.1 Intake date(s)

The programme starts on September 1.

Article 7.2 Admission requirements

1. Admission to the Master's programme is possible for an individual student who can demonstrate that he/she has the following knowledge, understanding and skills at the Bachelor's degree level, obtained at an institution of academic higher education:
   a. knowledge of psychological theories
   b. understanding of psychological theories
   c. skills in psychological theories

2. The Admissions Board will investigate whether the applicant meets the admission requirements.

3. In addition to the requirements referred to in the first paragraph, the Board will also assess requests for admission in terms of the following criteria:

   A. Programme Clinical and Developmental Psychopathology
      Students need a bachelor's degree (or equivalent) in Psychology or Educational Science, or a closely related subject area; and an average grade of 7.5 or equivalent thereof.
      The student's previous education must have included the following subjects and the minimum study load indicated:
      - research oriented courses (methods, statistics) (12 EC);
      - introductory courses in clinical diagnosis and assessment of mental health problems and risks. (12 EC).
      The admission procedure includes an assignment.

   B. Programme Cognitive Neuropsychology
      Students need a bachelor's degree (or equivalent) in Psychology, Cognitive Science, Artificial Intelligence, Biology, Medicine or a closely related subject area; and an average grade of 7.8 or equivalent thereof (e.g., A-).
      The student's previous education must have included the following subjects and the minimum study load indicated:
      - research oriented courses (methods, statistics) (12 EC)
C. Programme Genes Behaviour and Health (starting 2018-2019, with a proviso)  
Students need a bachelor’s degree (or equivalent) in Psychology, or a closely related subject area; and an average grade of 7.5 or equivalent thereof. 
The student's previous education must have included the following subjects and the minimum study load indicated:  
- research-oriented courses (methods, statistics) (12 EC);  
The admission procedure includes an assignment.

D. Programme Social Psychology: Regulation of Social Behaviour  
Students need a bachelor’s degree (or equivalent) in Psychology, or a closely related subject area; and an average grade of 7.5 or equivalent thereof. 
The student’s previous education must have included the following subjects and the minimum study load indicated:  
- research oriented courses (methods, statistics) (12 EC);  
The admission procedure includes an assignment.

Article 7.3 English language requirement for English-language Master’s programmes for international students

1. The proficiency requirement in English as the language of instruction can be met if, no longer than two years before the start of the programme, the applicant has successfully completed one of the following examinations, with at least the scores indicated:  
   - IELTS: 6.5  
   - TOEFL paper based test: 580  
   - TOEFL internet based test: 92  
   - Cambridge Advanced English: A, B or C.

2. Exemption is granted from the examination in English referred to in the first paragraph to students who, within two years of the start of the programme:  
   - met the requirements of the VU test in English language proficiency TOEFL ITP (Institutional Testing Program), with at least the score of 580 (www.taalloket.nl/nl/toefl-itp), or  
   - had previous education in secondary or tertiary education in an English-speaking country as listed on the VU website, or  
   - have an English-language ‘international baccalaureate’ diploma.  
   - graduated from a Dutch VWO institute with a grade of 7 or higher for English

Article 7.4 Pre-Master’s programme  
There is no pre-master’s programme

8. Interim examinations and results

Article 8.1 Sequence of interim examinations

Students may participate in interim examinations [or practical exercises] of the components below only if they have passed the interim examination or examinations for the components mentioned hereinafter:  
- Programme Clinical and Developmental Psychopathology:  
  Master’s thesis only after passing Research Project I  
- Programme Social Psychology:  
  Research Project II + III (Ma-thesis) only after passing Research Project I

Article 8.2 Validity period for results

The Examination Board may impose a supplementary or replacement examination for a course for which an examination was passed more than 6 years ago in case the examined knowledge or skills are demonstrably outdated.
Section B2: Programme specific – content of programme

9. Programme objectives, specializations and exit qualifications

**Article 9.1 Workload**

1. The programme has a workload of 120 EC

**Article 9.2 Specializations**

not applicable

**Article 9.3 Programme objective**

The programme aims to provide knowledge, skills and understanding in the field of the programme in question, such that a graduated student is capable of working independently at a professional level. A graduated student should be eligible for a follow-up training programme in scientific research.

**Article 9.4 Exit qualifications**

The exit qualification can be found in Appendix I

10. Curriculum structure

**Article 10.1 Composition of the programme**

1. The programme comprises at least a package of compulsory components and an individual Master’s thesis or academic internship.

2. Additionally the programme can offer:
   - Practical exercises
   - Electives

3. Educational components are categorized as specialized (400), research oriented (500) and highly specialized (600) level.

**Article 10.2 Compulsory educational components**

A detailed description per educational component can be found in the Study Guide.

**A(i) Clinical and Developmental Psychopathology**

Article 10.3 Elective educational components

In all programmes in each year of study the student can choose electives from the list below, without requesting permission of the Examination Board. Some courses are offered once every two years: X in 2018-19, but not in 2019-20, XX not in 2018-19, but in 2019-20. Students can choose electives from other programmes but in that case need to request permission to follow such a course from the Examination board from this faculty as well as from the faculty that offers that course. More details can be found on VUnet.

11. Evaluation and transitional provisions

Article 11.1 Evaluation of the education

The education provided in these programmes is evaluated in accordance with the (attached) evaluation plan. The faculty evaluation plan offers the framework.

Article 11.2 Transitional provisions

By way of departure from the Teaching and Examination Regulations currently in force, the following transitional provisions apply for students who started the programme under a previous set of Teaching and Examination Regulations:
In cases when a component is dropped from the obligatory study programme, two more opportunities will be offered to complete the exam for this component in the ensuing academic year.

Advice and approval by the Programme Committee, on 8 May 2018

Approved by the Faculty Joint Assembly, on 26 June 2018

Adopted by the board of the Faculty of Behavioural and Movement Sciences on 16 July 2018.
Appendix I Learning outcomes

Learning outcomes Clinical and Developmental Psychopathology

1. Dublin Descriptor Knowledge and insight
   1.1. Knowledge of and insight into current research questions with regard to biological, (neuro)physiological and psychological aspects of healthy and pathological cognitive, social and emotional development, and clinical issues, including their historical background
   1.2. Knowledge of and insight into formulation of plans, including set-ups, methods, procedures and analyses, for tackling fundamental and clinical research questions
   1.3. Knowledge of and insight into basic and complex analyses of diagnostic, observational, self-report and test (DOST) data derived from general population and clinical samples of human participants
   1.4. Knowledge of hardware and software to collect, process and analyse DOST data
   1.5. Knowledge of advanced research techniques and methods used in the study of psychopathology and development

2. Dublin Descriptor Application of knowledge
   2.1. The ability to integrate knowledge from different disciplines (e.g., biology, neuroscience and psychology) relevant to fundamental and clinical science of psychopathology
   2.2. The ability to apply knowledge from fundamental and clinical science of psychopathology to frame and answer research questions relevant to this field of study, and to apply knowledge on diagnostics in the choice and evaluation of interventions
   2.3. The ability to design and conduct experimental and field research in the domain of clinical and developmental psychopathology science

3. Dublin Descriptor Judgment formation
   3.1. The ability to evaluate the methods used and the results obtained in studies on clinical and developmental psychopathology
   3.2. Insight into the scientific relevance and societal value of research achievements in the field of study
   3.3. The ability to reflect on social and ethical issues pertaining to the dissemination and application of research results

4. Dublin Descriptor Communication
   4.1. The ability to comprehensively and engagingly present results and interpretations thereof to a specialist and non-specialist audience
   4.2. The ability to write a scientific report in the form of a scientific (peer-reviewed) paper
   4.3. The ability to contribute to scientific discussions about research plans and results
   4.4. The ability to work in an interdisciplinary research environment

5. Dublin Descriptor Learning skills
   5.1. The ability to reflect on one’s own learning skills and abilities
   5.2. The ability to evaluate one’s functioning and to formulate final aims
   5.3. Working experience in a research environment and awareness of one’s own scientific weaknesses and strengths
   5.4. Working experience in a clinical environment and awareness of one’s own weaknesses and strengths
   5.5. The ability to autonomously collect scientific information and to analyse and evaluate this information critically

These learning outcomes are tested in the following courses

Learning outcomes Cognitive Neuropsychology

1. Dublin Descriptor Knowledge and insight
   1.1. The student knows the state of the art in theory and research in the field of cognitive neuropsychology.
   1.2. The student can recognize and describe neuropsychological dysfunction and disorder.
   1.3. The student knows the caveats and limitations of the theories, methods, and clinical implications involved in Cognitive Neuropsychology.

2. Dublin Descriptor Application of knowledge
   2.1. The student can design, conduct and analyse experiments
   2.2. The student can examine cognition in patients.

3. Dublin Descriptor Judgment formation
   3.1. The student is able to judge what adequate science is and what is misapplication and misuse of scientific findings.
   3.2. The student understands the ethics of running studies involving subject groups such as patients, elderly and children.
   3.3. The student shows self-criticism and awareness of the limitations of his or her own experimental findings.

4. Dublin Descriptor Communication
   4.1. The student can write a comprehensive research report in article (APA) style.
   4.2. The student can defend his study in front of fellow researchers.
   4.3. The student can communicate information, ideas, problems and solutions to non-specialist audiences.

5. Dublin Descriptor Learning skills
   5.1. The student can find his or her way around in the relevant literature, and can develop research questions on the basis of this literature.

TOTAL PROGRAMME 120

Learning outcomes Genes in Behaviour and Health

1. Dublin Descriptor Knowledge and Insight.
   1.1. Knowledge of and insight into current research questions with regard to genetic and environmental contributions to individual differences in behaviour and health
   1.2. Knowledge of and insight into formulation of plans, including set-ups, methods, procedures and analyses, for tackling research questions in the genetics of behaviour and health
   1.3. Knowledge of and insight into basic and complex analyses of genetic data obtained in the general population, (twin) family populations and clinical populations
   1.4. Knowledge of advanced research techniques and methods used in the field of behaviour genetics and genetic epidemiology
   1.5. Knowledge of the experimental methods used to collect psycho(physio)logical data within genetically informative designs and insight into the way these data can provide insight into the pathway from genes to behaviour and health.

2. Dublin Descriptor Application of knowledge
   2.1. The ability to integrate genetic knowledge with knowledge from different disciplines (e.g., psychology, education science, psychiatry, neurosciences, biomedical sciences, movement sciences, ethics and philosophy of science).
   2.2. The ability to design and conduct experimental research in the domain of behaviour genetics and genetic epidemiology.
   2.4. The ability to use psycho(physio)logical and brain imaging data to frame and answer research questions concerning the pathways from genes to health.
2.5. The ability to conduct big data analyses and record linkage

3. **Dublin Descriptor judgment formation**
   3.1. The ability to evaluate the methods used and the results obtained in studies on behaviour genetics and molecular genetics
   3.2. Insight into the scientific relevance and societal value of research achievements in the field of study
   3.3. The ability to reflect on social and ethical issues pertaining to the dissemination and application of research results

4. **Dublin Descriptor communication**
   4.1. The ability to write a scientific report in the form of a scientific (peer-reviewed) paper
   4.2. The ability to comprehensively and engagingly present results and interpretations thereof to a specialist and non-specialist audience
   4.3. The ability to contribute to scientific discussions about research plans and results
   4.4. The ability to work in an interdisciplinary research environment and act as part of international consortia

5. **Dublin Descriptor learning skills**
   5.1. The ability to reflect on one’s own learning skills and abilities
   5.2. Working experience in a research environment and awareness of one’s own scientific weaknesses and strengths
   5.3. The ability to autonomously collect scientific information and to analyse and evaluate this information critically
   5.4. International competence: The ability to work in multicultural international teams, good communication skills, and the ability to form international networks

**Learning outcomes Social Psychology**

1. **Dublin Descriptor Knowledge and insight**
   1.1. Knowledge of and insight into basic theories and current research questions with regard to social psychological issues, and their relations to adjacent disciplines.
   1.2. Knowledge of and insight into the formulation of hypotheses and designing methods and procedures for investigating basic and applied research questions that are related to social psychology.
   1.3. Knowledge of and insight into the strengths and limitations of social psychological theories, as well as of the various research methods used to acquire knowledge in social psychology.
   1.4. Knowledge of advanced statistical techniques used in the study of social psychology

2. **Dublin Descriptor Application of knowledge**
   2.1. The ability to integrate knowledge from adjacent disciplines (e.g., social neuroscience, economics, and various sub-disciplines within psychology) relevant to theory development and empirical research questions within social psychology
   2.2. The ability to apply knowledge from basic and experimental social psychology to frame and answer research questions relevant to societal issues that are related to social psychology
   2.3. The ability to design and conduct experimental and field research in the domain of social psychology

3. **Dublin Descriptor Judgment formation**
   3.1. The ability to evaluate the methods used and the results obtained in studies on social psychology
   3.2. Insight into the scientific relevance and societal value of research findings in the field of social psychology
3.3. The ability to reflect on social and ethical issues pertaining to conducting research and the dissemination and application of research results

4. Dublin Descriptor Communication
   4.1. The ability to comprehensively and engagingly present research findings at scientific conferences as well as for non-specialist audiences.
   4.2. The ability to write a scientific report in the form of a research proposal, or a (review or empirical) paper suitable for submission to an international scientific journal.
   4.3. The ability to respond to critical remarks by peers, as well as to constructively contribute to scientific discussions about research plans and results.

5. Dublin Descriptor Learning skills
   5.1. Increasing awareness of one’s own scientific weaknesses and strengths.
   5.2. Gaining work experience in an academic environment.
   5.3. The ability to independently search for relevant scientific literature, and to critically integrate this information into one’s own research paper or proposal.

Appendix II

Evaluation plan FGB
Kirsten Bijker, Director of Education, May 2018

Aim
The evaluation of courses and/or groups of courses (minors, learning continuity pathway) is part of the PDCA cycle at the level of the course as formulated in the ‘VU toetskader’. Curriculum evaluations are carried out at programme level.
The evaluation of education aims to gain insight into the quality of the education provided and/or the coherence between courses. This insight is used at various levels within FGB to maintain the quality of education and, where necessary, to improve it and to communicate about this to students.

Course evaluations
The courses of the FGB programmes are evaluated annually via the digital evaluation form in VUnet ‘Digitaal Evalueren’ (DE). Below is described which actors are involved in the evaluation of courses and which tasks these actors have in the process of evaluation.

Student
- Fills in the digital course evaluation form after the course has ended

Course coordinator
- Encourages students to complete the evaluation form
- Makes the evaluation form suitable for his/her course, and includes questions on the exam(s) used in the course
- Responds to students via VUnet on the results of the evaluation and indicates whether and, if so, which changes will be made to the course

Evaluation coordinator
- Monitors whether all courses appear in VUnet DE
- Is available for questions of lecturers regarding the adjustment of evaluation forms
- Saves the evaluation reports
- Processes the evaluation results in an overview sheet
- After each teaching period, makes the overview sheets and the evaluation reports available for programme directors, programme committees and the examination committee

Programme directors
- Inspects the overview sheet and, where necessary, the evaluation reports
- Discusses, where necessary, the course evaluation with the course coordinator, the programme committee and/or examination committee and may take action based on these discussions
- Discusses the course evaluations in general and any taken actions during the annual interview with the portfolio holder for education and the director of education
- Inserts the results of the course evaluations in midterm reviews and critical self-reflections
- Provides, on request, supervisors with input on education for the annual interview with the lecturer

Programme committee
- Discusses the evaluation reports after each teaching period
- Invites, if desired, course coordinators to the meeting of the programme committee to discuss the results
• Provides the programme director with solicited and unsolicited advice on the quality of the courses
• Discusses the course evaluations and any actions taken in the annual report
• Indicates in the annual plan whether there will be special attention for a course or group of courses

Examination committee
• Inspects the overview sheets and, if desired, the evaluation reports
• If necessary, takes action based upon the results of a course evaluation and discusses the action taken with the programme director and course coordinator
• Discusses the course evaluations and any actions taken in the annual report
• Indicates in the annual plan whether there will be special attention for a course or group of courses

Supervisors of lecturers
• Supervisors may ask the programme director of the programme in which the lecturer participates to provide input for the annual interview, in which the interpretation of the programme director forms an important part of the information the supervisor receives

Portfolio holder for education /Director of education
• Discusses course evaluations in a general sense with programme directors during the annual interview
• Discusses the quality of education in the annual education report

Evaluations of groups of courses
Evaluation of groups of courses like minors, learning continuity pathways or methodology pathways, are carried out at the initiative of the programme director, programme committee or examination committee. There are no formats for these kinds of evaluations; a questionnaire must be created by the parties involved and distributed among students. Results of the evaluations are discussed in consultation between the programme director and the programme committee and/or the examination committee and noted in annual reports. Where possible, planned evaluations of groups of courses are included in the annual plan of, for example the programme committee or examination committee.

Evaluation of (parts of) the curriculum
The evaluation of (parts of) the curriculum takes place automatically via VUnet DE. The results are sent by the evaluation coordinator to the programme directors and programme committees and are discussed in consultation between the programme committee and programme director.
